<https://play.google.com/store/apps/details?id=com.menuspring.eet>

Android, Php , Zend, RestFul , JSON , MySQL, Apache Solr

MENUSPRING-EET ResPager (MenuSpring INC UK) (Restaurant Pager App)

https://play.google.com/store/apps/details?id=com.eet_menuspring.menupager
Android, Php, Zend, RestFul, Apache Solr, JSON, GCM aka Firebase.

*Please note that above mentioned Golootlo, EET and associated apps were MENUSPRING INC UK intellectual property and are/were subjected to company's privacy policies – I still **honour** NDAs signed with those companies.*

Short Projects description:

Golootlo – DECAGON PVT LTD (previously owned by MENUSPRING INC, UK)

Golootlo app is the simplest and fastest way to access the best discounts near you. Golootlo app gives you access to thousands of discounts at nearby cafes, restaurants, salons, retailers, grocery stores, doctor's clinics and so much more. Discover live offers right at your fingertips, access merchant info, directions, location, menu and pictures all in one place, and save everyday on thousands of things to do, eat, see and shop. Login and simply love every moment; whether you are a foodie, sports fan, a shopaholic or an entertainment junkie, we promise to give you the power to make the right choice with rewards & savings on 1000s of brands.

EET – MENUSPRING INC, UK:

Use eet to read menus, search dishes, share favourites and more for thousands of restaurants in and around London.

eet introduces a real time display of table availability at select London restaurants, bringing dining in to the age of on-demand service and connectivity. Browse restaurants nearby or across London based on their availability to seat you now. Just two taps and the restaurant immediately knows that you are on your way. No need to call ahead for reservations or trek across the city for shorter queues - eet connects you to culinary London in real time.

eet menu technology currently powers both TimeOut London & Tastecard providing their readers access to over 750,000 dishes from more than 9,000 restaurant menus. Our app is the easiest to use and most complete restaurant and foodie app allowing you to search, discover and share restaurants and dining experiences around London, and then to grab a seat at the one you most crave. Come explore, share and celebrate with us, while discovering new cuisines and restaurants, guaranteed to whet your appetite.

EET Restaurant Pager APP:

(Note : MENUSPRING-EET ResPager- for restaurants subscribed to eet's Real Time Tables Availability platform ONLY. The RealTime Availability feature and will not work without a currently active subscription.)

Work History, Various Roles & Responsibilities:

MenuSpring INC, UK

Principal Software Architect (Front end Apps,)

Roles & Responsibilities: Development, designing, testing and maintenance operations of core front end application in native Android, including integration with backend core RESTful web-services as well as integration with Realtime data push mechanisms like Firebase & App Engine, AWS, Amazon EC2, plus product enhancements like efficiency, scalability and availability and smoothing products' overall architecture using state of the art engineering, tools, APIs and services. (Products include EET App, EET Restaurant Pager App, and Golootlo App), noting that EET Restaurant Pager App was the only available app of it's nature on Google Play Store at the time.
